*Celebrating 150 years of
St. Stanislaus High School*

World Class Quality Education Affordable For All

As We Celebrate Our Sesquicentennial Year

We invite you to share our "Dream Stanislaus", a transformational project focused to create a Public School that will help children become globally competitive. This involves re-designing of existing school infrastructure, software, mind ware, class rooms, laboratories, library and playgrounds. It also covers technology in class and activity based demo kits. This transformation can only happen with your whole hearted support.

Furthermore, this dream school will provide modern facilities and training to students and teachers that will enhance high quality education in class with highly qualified teachers. Such a school will benefit students from all economic backgrounds which will include the needy who cannot afford but have the enthusiasm and potential for higher academic performance.

"**Dream Stanislaus**" is driven by three strategic intentions that are aligned with the school's mission and vision.

1. Developing young people of high competence and character - New pedagogical and learning schemes.

2. Building modern learning facilities - Continuous development of a robust physical and digital infrastructure supporting all-round learning goals.

3. Developing an agile learning organization - Training our teaching staff and improving our non-teaching practices to match the transformation.

Your generous contribution will help St. Stanislaus High School, a Jesuit Institution, to continue its 150 year old tradition of excellence and accessibility in education, helping Stanislites in the past, present and future to live up to the motto, "Born for Greater Things".
